

Specialization

Lean-Agile Project Management

This specialization builds your ability to lead customer-focused projects through adaptive planning, cross-functional collaboration, and iterative delivery using Lean-Agile principles and frameworks. The Lean-Agile Project Management specialization consists of one prerequisite course and four required courses.

Total Units: 6

Learning Outcomes:

- Apply Lean-Agile principles and mindful practices within the context of the project team and the larger organization.
- Originate and evolve the iterative release plans, from concept to cash, based on rapid delivery of business value, using stakeholder collaboration, and empowered cross-functional teams practicing real-time continuous improvement.
- Succeed within the Scaled Agile Framework (SAFe®) for Lean Enterprises to achieve organizational-level agility by leading knowledgeably and effectively with enterprise-wide Lean-Agile teams.

*Courses may have prerequisites; review the course page before enrolling. A checkmark indicates the course is typically offered during that term.**
